Price vs on-time delivery (bubble = spend)

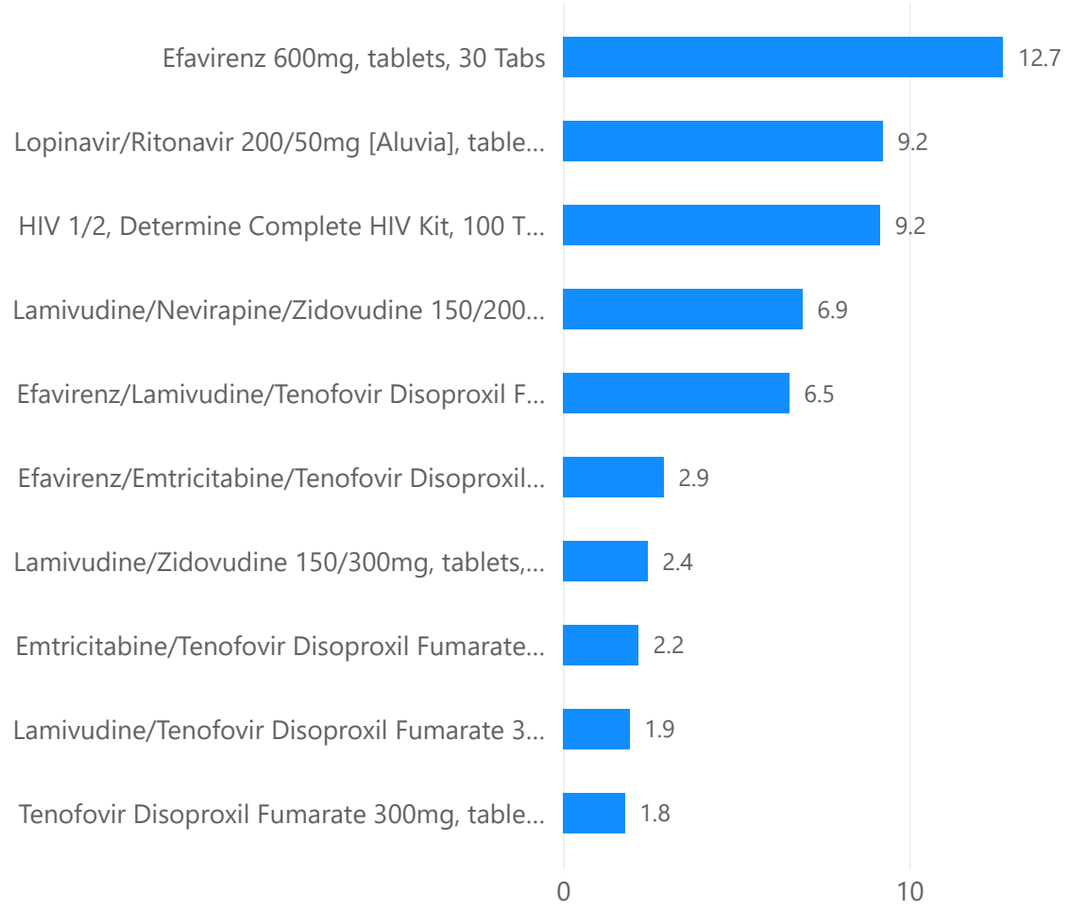

Price Savings Ceiling ($M)

66.1

LP Saving ($M)

2.53

Top 10 items by price-variance saving ($M)

LP saving ($M) by delivery rule and capacity limit

delivery_rule	1.00	1.25	1.50	2.00
overall	0.00	2.00	2.53	2.78
per item	0.00	1.54	2.02	2.19

How to read this. $66.1M is a ceiling: if every order had paid the item's 25th-percentile price that year. Most overpriced lines are small urgent orders (median 211 packs vs 4,162).

The LP re-splits 2013–15 volume between existing suppliers: no supplier above 1.5× its past volume, no new single-sourcing above 70%, on-time no worse. Saving: $2.53M if on-time is protected overall, $2.02M if protected for every item.
